THE NEW PRO MODEL RETRIEV-R-TRAINER

OPERATING INSTRUCTIONS

Please read BEFORE attempting to operate product!

AMERICAN MADE AND BACK BY A 3 YEAR WARRANTY

PLEASE READ CAREFULLY BEFORE ATTEMPTING TO OPERATE
RETRIEV-R-TRAINER INSTRUCTIONS

The Retrieval-R-Trainer is a practical aid for training retrievers. Training dummies designed for the use with it can be power thrown two to three times farther than hand thrown dummies. They are useful on land or water. Extra dummies can be used to throw doubles, triples, etc. The Retrieval-R-Trainer uses blank power charges for throwing power.

The accompanying report eliminates the need for a blank pistol.

BLANK POWER CHARGES

Choose your power charge based on the distance you wish to throw the dummy. Use only those charges intended for the Retrieval-R-Trainer that are available at a certified Retrieval-R-Trainer retailer.

Light Green Load—Distance of approximately 150'

Medium Yellow Load—Distance of approximately 200'

Heavy Red Load—Distance of approximately 300'

MAINTENANCE

User must thoroughly clean the barrel, chamber, and hinge areas with a good gun cleaning solvent after each use. Failure to properly maintain the RRT Launcher may result in serious injury or death.

You may purchase the RRT Cleaning Kit at any of our retailers listed on our website: www.RRTlauncher.com. A small amount of gun oil applied to the hinge area after cleaning will help to insure smooth operation. Cleaning of the chamber can be enhanced by using a .22 caliber wire brush.

Also, thoroughly clean and dry the inside of the dummy tube after each launch, be certain that prior to each time you launch the

WARRANTY

The Retrieval-R-Trainer Launcher is guaranteed for **3 years** of the date of purchase to be free of manufacture defects. This guarantee is void if other than the recommended power charges are used or if the product is not used in conformance with these instructions.

Retrieval-R-Trainer dummies are guaranteed for a period of one year from the date of purchase to be free of manufacture defects. Dogs must be trained to 'soft mouth' all dummies. For warranty concerns please contact us.

NON-WARRANTY REPAIRS -LAUNCHERS ONLY

Please contact Specialty Products Company listed below prior to sending you launcher for repair. We will provide you with an estimate for repair and shipping costs.

WARNING!

- **With the dummy, you are firing what is equivalent to a six to eight ounce bullet. A heavy recoil and loud report should be expected. ALWAYS use eye and ear protection and wear heavy leather gloves when firing.**
- **Expect a loud report when the launcher is fired, prolonged exposure to loud report may effect hearing to dogs and surrounding persons.**
- **Expect heavy recoil from the use of the product, especially when using red power loads. Exercise extreme caution at all times.**
- **Never attempt to load your Retrieval-R-Trainer with bullets or charges other than those recommended.**
- **Always remove the training dummy from the barrel of the launcher before storage.**
- **Before firing every time check to see that the barrel and the metal insert in the dummy are free of obstructions prior to loading the dummy or power charge.**
- **The Retrieval-R-Trainer is NOT A TOY! DO NOT ALLOW CHILDREN TO PLAY WITH OR OPERATE THE UNIT.**
- **THIS PRODUCT CAN BE HAZARDOUS!**
- **NEVER POINT OR FIRE The Retrieval-R-Trainer AT A PERSON OR ANIMAL!**

If you do not understand the instructions or have further questions regarding the use and operation of the Retrieval-R-Trainer please discontinue use and contact *Specialty Products Company USA* at (570) 729-7192 with your questions.

dummy from you launcher that it is free of debris both internally and externally. Failure to properly maintain the aluminum insert tube in you dummy may result in serious injury or death. A rubber “O” Ring in a groove near the outer end of the barrel provides a seal for the release gases of the power charge. This “O” Ring will wear causing some of the gases to escape, thereby reducing the flight distance of the dummy. Apply a thin coat of Vaseline, or any other lubricant safe for use on rubber components, to prevent drying and cracking of the o-ring. Replacement “O” Rings are available from our retailers on our website.

Your RRT Launcher is not a firearm, but the same handling, care, and safety precautions must be exercised. Your Retrieval-R-Trainer is provided with certain built-in safety features, but are not substitutes for safe handling practices, which include the use of ear and eye protection as well as the use of heavy leather gloves.

DISCLAIMER

Any use or modification of the RRT Launcher not in conformity with the manufacturer’s instructions as described in this user’s manual is **AT THE SOLE RISK AND RESPONSIBILITY** of the individual performing such unauthorized use and/or modification. Direct any inquires regarding use to Specialty Products Company prior to use or continued use of this product.

PREPARATION FOR FIRING

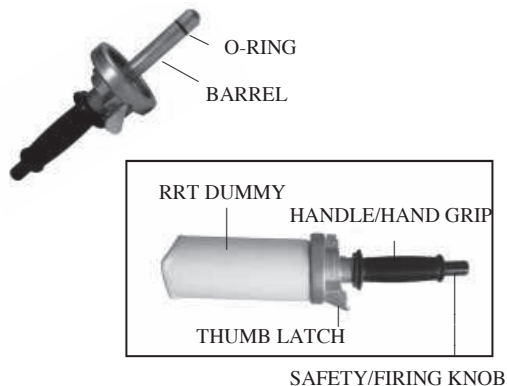

Place a RRT training dummy over the barrel and slide it down.

The distance of the throw can be controlled by how far the dummy is placed down the barrel — all the way for maximum distance, less for shorter throws.

Open the breech by pressing the thumb release/latch located in the middle of the launcher just above the hand grip.

The launcher will now pivot open exposing the open chamber for receiving the blank power charge. Fully seat the charge in the chamber as you would a single shot rifle or shotgun.

Close the unit and press the thumb latch to insure that it is fully closed.

LAUNCHING

Firmly grasp the launcher handle in one hand with the thumb latch oriented toward the shoulder of the holding arm. The heel of the holding hand should be facing the thumb latch and your fingers should be wrapped firmly around the grip. Your thumb will be closest to the Pull Knob. Bend the elbow slightly and position the launcher about waist high and one foot from you body. Aim about 45° from the horizontal off to your side toward the target area. Pull the firing knob back to its fully extended position and release it to launch.

NOTE: NEVER DRY FIRE your Retrievr-Trainer!
